HYP2RLITE

POWERFLY HOLDER

Designed as our best holder to date, this product was inspired by the OD1N prototype project, to help players increase their acceleration with a stiffer front post, and enhance their responsiveness through turning and edging. Coupled with a new steel line up that improves security of the blade and durability of the holder.

AEROLITE 2.0 TONGUE

Modified from its predecessor, the Aerolite 2.0 Tongue features comfort felt on both medial and lateral side and maintains the lightweight foam core.

HYPERFLEX OUTSOLE, POWERFLY STEEL PERFORMANCE

Uniquely constructed with a first-of-its-kind flexible material, strategically positioned in the heel to let you maximize quickness in acceleration and agility through turns. Combined with the benefits of the powerfly holder, players can fly past the competition.

HOW TO MEASURE

- For best results, take measurements over undergarments.
- Hold tape measure firmly, not tightly.
- Keep tape measure parallel to the floor.
- Match your measurements to the above size chart. If measurements fall between sizes: order smaller size for tighter fit or the larger size for a looser fit.
- If measurements for chest and waist correspond to two different suggested sizes, order the size indicated by the chest measurement.
- Each material should indicate what silhouette/fit is used (e.g. slim/modern, hockey fit, loose fit), so if it's a slim fit and you normally like a looser fit, you should order up a size.

MOBILITY CONTROL STERNUM AND SHOULDER FLOATERS

The lacrosse-inspired Mobility Control Sternum and Shoulder Floaters sit off of the chest pad itself, lessening the direct impact to the chest of the goalie, and allowing the goalie to look big in net.

FUSECOMP ARMS

FuseComp improves overall protection in the arms with reinforced foam.

REMOVABLE ARMS

Removable arms allows for customizable fit and spec, with improved Vapor-style mobility
